

# **Coursework 1**

**Systems Programming (H) 2025-26**

**COMPSCI4081**

This is my own work as defined in the Academic Ethics agreement.

Based on running on an STLinux server, my solution compiles without errors or warnings. While testing with small.txt and large.txt no differences were detected, and the expected output was gathered. From this testing no bugs were found that I am aware of.
